

10,000 downloads already for the My Brussels app, which is adding new features

Brussels, 7 April 2021 - My Brussels is the 100% free app that allows Brussels residents to access a wide range of information and services in just a few clicks. Launched barely four months ago, the app has been a huge hit with the people of Brussels thanks to its intuitive, customisable interface, with more than 10,000 downloads already. Above all, the app has been enhanced with new features.

A new version of My Brussels, the 100% free app available on iOS and Android, has been launched. In addition to the weather, traffic information and STIB timetables, My Brussels now offers data on animal shelters, Actiris branches and the digital public spaces. The app, which also aims to create dialogue between the public, businesses and public authorities, now allows Brussels residents to put forward their suggestions for improvement directly in the app.

New features

It's already time for a new version of the My Brussels app to be launched, with a range of new features and data. It is now possible to consult the locations of animal shelters, places accessible to people with reduced mobility or to find out about separating waste.

Brussels residents can find the nearest public toilets, digital public spaces, find out where Actiris branches are located or search for the closest medical centre.

"Our aim is to add more services. This app will constantly evolve", announced the Brussels Minister for Digital Transition, Bernard Clerfayt (Défi), when the app was launched last December.

Mission accomplished!

At the service of Brussels residents. The app now has a space reserved for "suggestions", to facilitate dialogue between the public, businesses and public authorities. It will now be possible for Brussels residents to share their wishes for future developments of the app.

"With these new features, we are continuing our efforts to make the Brussels Region a connected region, thereby becoming one of the leading European Smart Cities," concludes Bernard Clerfayt, Brussels Minister for Digital Transition.
